1 INTRODUCTION

1.1 Objectives

The objective of this document is to describe what our software will do. It states what the software will do and not how it will do it.

1.2 History

Although there is no current system, we already have a GitHub repository and all members are invited.

1.3 Scope

The webpage should allow the users to lookup their favorite series. You should be able to select your favorite series/shows/anime and lookup information like author, director, actors, etc and sum up the time which they investigate in watching series. The User also should be able to look up todays series at prime time on Austria/German TV channels.

Planning Phase

- Project proposal
- User Requirements Specification

Development Phase

- Implementing the mandatory features
- Implementing the highly desirable features
- If there is enough time
 - Implementing the desirable features
 - Implementing additional features

Testing Phase

- Testing the webpage
- Refinement

Presentation Phase

- Presenting the final webpage
